

Your Class Companion
Remembering All the Data You Say Aloud

Teachers are feeling overwhelmed.

The average teacher juggles data on more than 150 students a day. That's a lot to manage, and after a long day of teaching, it's hard to remember every detail - and it's exhausting.

That's where Socrait comes in.

Socrait is your class companion that collects and converts teachers' speech into actionable data.

We've trained the AI to pick up key moments to help a teacher with after-school admin tasks like:

- **Behavior Tracking**
- **Class Summaries**
- **Parent Emails**
- **Task Reminders**
- **Attendance Data**

Use Your Teacher Voice

1 Before class, press the stream button

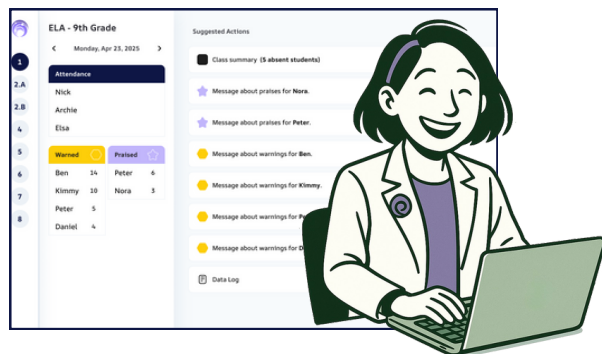

Press
to
Start

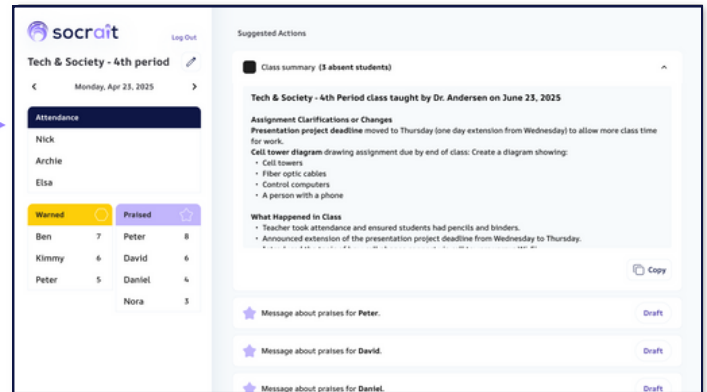

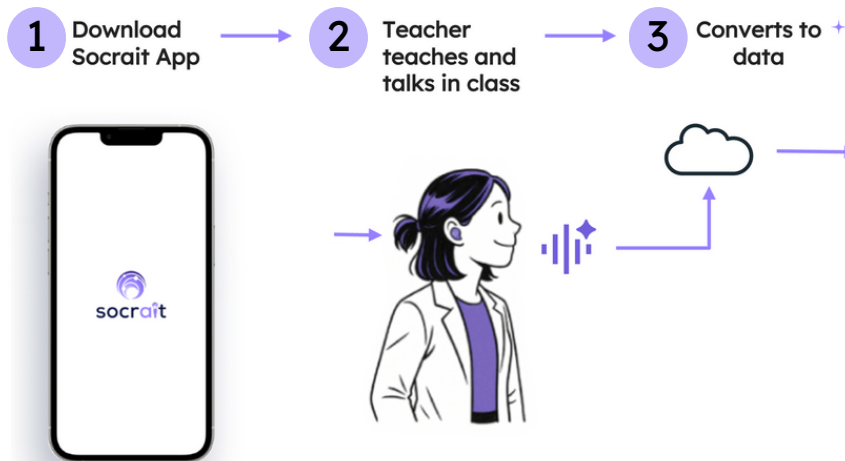

2 Teach as you normally would

3 Log in to your dashboard for data

Creates a detailed summary of every class.

Socrait would remind me of things that happened during class that I didn't remember. I was able to review praises, warnings and follow-up to share with students and parents.

~Megan Theorine, MS Teacher

Privacy First Principles

Socrait protects teacher and student privacy.
[Read our privacy policy here.](#)

- FERPA Compliant
- Socrait does not record. It's been trained to listen.
- No teacher or student data is sold or shared.
- Teachers own their classroom data, and can delete it anytime.
